

PMSAR OPERATIONAL INSTRUCTIONS

Date Time Group:

01/20/2008 1000

Situation:

Partial Unit Training

Mission:

Who: Operations Leaders and Operations Personnel

What: The unit will conduct advanced training on the Maptech Terrain Navigator Pro program. TNP 8.0 with streets options will be demonstrated for evaluation to determine if we want to upgrade the unit to this new version.

When: 1300, 20 January 2008.

Where: Fire Station 52 in Gig Harbor WA.

Why: To increase proficiency of unit Operations Personnel using TPN for producing search maps for mounted teams and mission report maps for debriefings and reporting our activities to the Sheriff.

We will learn to produce our maps using the layering features of the program. Meaning we will produce maps that have Markers, team reports, search areas, team tracks and alike each on a different layer.

We will learn to use shading and highlighting to enhance areas we wish to bring special attention.

We will learn to use colors to separate/identify search teams.

Paul Fleming will be the OL for this exercise.

Service Support:

Sanitation facilities are available.

Water is available on site.

Command/Signal
